Class # 1 – EMT Continuing Education

This is a three-day course that will cover all training requirements as set forth by the Kentucky Board of Emergency Medical Services (KBEMS) and the National Registry of EMT's for the 24-hour EMT Refresher Course/NCCP and incorporate both lecture and practical experience, including competency testing. [Sponsored by Air EVAC](#)

Friday – 12:00pm – 8:00pm

Saturday – 9:00am – 5:00pm

Sunday – 9:00am – 5:00pm

Class # 2 – Swift Water Awareness

The course is appropriate for any emergency responder (Fire Service, Law Enforcement, EMS and Public Works.) that could find themselves within 10 feet of the water's edge during a swiftwater or flood incident. Swiftwater is defined by the National Fire Protection Association (NFPA) as water moving at a rate that exceeds one knot or approximately 1.15 miles per hour (mph). By comparison, the average walking pace is 3.3 mph. This course reviews proper safety at a swiftwater incident and how responders can safely stay away from the hazards that such incidents pose to citizens and emergency responders. Participants will learn the importance of scene safety and management, and general hazards. This course teaches all the knowledge and skills required to perform at the Awareness level according to NFPA 1670.

Friday- 6:00. p.m. -10:00 p.m.

Class # 3 – Engine Company Ops w/LIVE FIRE

As a member of an engine company, there are specific skills we must master. This hands-on course will go in-depth on three of those skills, stretching hose lines, knowing your proper flows, and efficient water application. When it comes to stretching hand lines, we only get one chance to get it right. This portion will cover hose line deployment, extending lines, and difficult stretches such as obstacles and overcoming common stretching issues. Students will have multiple repetitions on each of these. Knowing your flow will be the second skill station. We must know how to match our hose to the proper nozzle. Students will flow different sizes and types of nozzles for handlines. Efficient application of water inside a fire is more important now than it has ever been. This portion of the course will cover water mapping, interior stream angles, and coordinated fire attack, while

using a new Live Fire Training Prop. This program is for all experience levels in the fire service.

****PRE-REQUISITES/EQUIPMENT NEEDED:**

Prior completion of subjects listed on the Live Fire Course Competency Validation form. This form must be mailed in with payment. Full PPE & SCBA with a spare cylinder is required. All PPE must be less than 10 years old and SCBA cylinders within hydrostatic test date. Any student with facial hair that impedes the seal of the face piece will not be allowed to participate.

Saturday – 9:00am – 5:00pm

Sunday – 9:00am – 5:00pm

Class # 4 – Pump Operations

Pumper Operations and Theory will allow the firefighter to learn competency in the performance requirements necessary to perform the duties of a pumper operator. Basic preventive maintenance, pump operation, hydraulic calculations, relay pumping, and pump testing will be covered. Students will execute these skills through hands on training involving a front-line pumper.

****Pre-Requisites/Equipment Needed:**

Safety glasses, helmet, turnout coat and work gloves.

Saturday – 9:00am – 5:00pm

Class # 5 – Water Supply Operations

This practical, hands-on class brings students together with mutual aid partners to learn the challenges of tanker shuttles, relay-pumping operations, drafting from a multiple drop-tank set up and other methods to provide sufficient water for the fire attack. This one-day course will refresh the water supply skills you have and add new tools to the box.

****Pre-Requisites/Equipment Needed:**

Safety glasses, helmet, turnout coat and work gloves.

Sunday – 9:00am – 5:00pm

Class # 6 – Water Rescue Boat Operations

Water Rescue Boat Operator is a course will familiarize students with boat operations in the flood/Swift water environment. Students will be exposed to several topics including types of motorized boats suitable for water rescue, boat handling on still or slowly moving water, crew roles, boat safety and problem solving. Class will consist of both Classroom and Hands-on Skills.

****Pre-Requisites/Equipment Needed:**

Class V PFD and Clothing suitable for water operations.

Saturday – 9:00am – 5:00pm

Sunday – 9:00am – 5:00pm

Class # 7 – BSAR – Basic Search and Rescue

This course is designed to provide guidance to SAR field responders on the best practices and techniques. Information about the duties and tasks of SAR field responders, current information on SAR field responder clothing and equipment, as well as details on the latest search techniques, information on SAR specialists such as hasty search, grid search, utilizing specialty teams, subject packaging, and transport. There will be a search on Saturday evening.

****PRE-REQUISITES/EQUIPMENT NEEDED:**

All students must have water, two flashlights, sturdy shoes (no tennis shoes) and appropriate dress for the exercise. If you have a SAR pack, please bring for the exercise. Pencil and paper required.

Friday - 6:00pm – 10:00pm

Saturday - 8:00am – 4:00pm & 6:00pm – 10:00pm

Sunday - 9:00am – 3:00pm

Any class with fewer than 10 students may be canceled. We will post on the SFRT 9 website and Facebook if classes are canceled, or you can call the SFRT District 9 office @ 606-462-2146 for more information.

We urge you to take advantage of these classes and pre-register now! Pre-registration also allows us to anticipate the need for extra instructors/equipment/class materials and to prepare for the best possible learning experience for each student.
